

Declaration on environmental protection policy and occupational safety Company Menzel Elektromotoren GmbH

In accordance with our corporate philosophy, we are aware of the responsibility for the respectful interaction with the environment. In the continuous improvement of products and processes, the economical use of resources is an important objective for us.

In accordance with the principle "No harm to human health and the environment", we strive for a working environment in which every person involved is protected.

We believe that this principle contributes to the success of the company as well as to the satisfaction of every employee, customer and partner.

For the environment, this means:

The environment in which we move daily is the foundation of our existence. We protect it and behave with it in a resource-efficient and responsible manner at all times. We strive for a constant improvement of our environmental performance as well as for the reduction of specific energy consumption. In this context, we also support our employees, customers and partners.

For occupational safety, this means:

We promote a work environment that protects the physical and mental well-being of our employees.

We ensure safety at work and technical safety for our employees, customers and partners in all business processes and continuously improve the work environment, work processes and workplace design.

In the two mentioned areas, we cooperate very closely with all interested parties in internal and external relations, in particular with our employees, co-determination bodies, partners, accident insurers, authorities, associations and other institutions.

Environmental and occupational safety is an essential management task. Therefore, the executives have a decisive leadership responsibility and serve as role models in our company.

Berlin, May 2018

Mathis Menzel, Managing Director

Dirk Achhammer, Managing Director
