

Declaration on environmental protection policy and occupational safety Menzel Elektromotoren GmbH

In accordance with our corporate philosophy, we are aware of our responsibility to treat the environment with care. In the continuous improvement of products and processes, the economical use of resources is an important objective for us.

In accordance with the principle of no harm to human health and the environment, we strive for a working environment in which every person involved is protected.

We are convinced that this principle contributes to the success of the company as well as to the satisfaction of each employee and our customers and partners.

For the environment, this means:

The environment in which we move every day is the basis of our existence. We protect it and treat it responsibly and in a resource-conserving manner at all times. We strive to continuously improve our environmental performance as well as our specific energy consumption. In this, we also support our employees, customers and partners.

For occupational safety, this means:

We promote a working environment that protects the physical and mental well-being of our employees. We ensure occupational and technical safety for our employees, customers and partners in all business processes and continuously improve the working environment, work processes and workplace design.

With the two areas mentioned above, we work very closely with all internal and external interested parties, especially with our employees, co-determination, partners, accident insurers, authorities, associations and other institutions.

Environmental protection and occupational safety is an essential management task. In our company, supervisors have a decisive leadership responsibility and function as role models.
