

Press Release

Hannover Messe:

Load-tested industrial motors

Menzel Elektromotoren shows a selection of motors from its huge portfolio at Hannover Messe and is looking forward to discussing individual drive solutions with trade fair visitors. The family-run company supplies customers around the world and specializes in project-specific configuration and fabrication of large industrial motors. Menzel has many years of experience in a wide range of industries, including the cement industry, steel mills, mining, the process industry, and power plants. Menzel supplies and manufactures three-phase asynchronous motors with slipring rotors up to 15,000 kW and with squirrel cage rotors up to 25,000 kW as well as DC motors up to 2,000 kW. Applications range from conveyors to mills, pumps, fans, and many other drive applications. All drive solutions are put through thorough in-house test runs before shipping. Trade fair visitors can take a virtual tour at the booth of Menzel's state-of-the-art load test field at the company's Berlin headquarters.

About Menzel Elektromotoren

Based in Berlin, Menzel Elektromotoren GmbH has been manufacturing and distributing electric motors for more than 90 years. The medium-sized company specializes in the delivery of large electric motors, including special models, within the shortest possible time. The product range comprises high and low voltage motors, DC motors, transformers, and frequency inverters. Services include motor production and short-term adaptation of stocked motors to application-specific requirements. In order to ensure fast deliveries to the customer at all times, the company maintains a very extensive inventory including more than 20,000 motors with a maximum performance of up to 15,000 kW. Qualified engineering, experienced staff, and state-of-the-art production and testing facilities help Menzel provide excellent reliability. Menzel operates subsidiaries in the UK, France, Italy, Spain, and Sweden, and cooperates with numerous partners worldwide.
